

THE BLACK HANGAR

The Black Hangar is being developed to be the Centre of Excellence for training courses in application technology for solids and liquids by ground or by air in NZ. The training programmes will incorporate both GROWSAFE[®] and Spreadmark[™] and will provide practical real life training to complement the rigorous theoretical course work.

Providing high quality, high level theoretical and practical training in application technology for agrichemicals, fertilizers and vertebrate toxic agents (VTA).

The use of agrichemicals and fertilisers must be efficient while minimizing environmental and human exposure including operators, bystanders and consumers of produce. Safe, responsible and effective application of agrichemicals and fertilisers is multi-disciplinary, combining aspects of biology, chemistry, agronomy and engineering, with meteorology and the newer disciplines such as biotechnology and information science.

How can you use the Black Hangar

If you apply agrichemicals, fertilizers or VTAs (poison baits) then you can be involved in several ways – from attending training courses specifically designed for your industry, to hiring the Black Hangar to deliver effective training courses yourself or running social events or making presentations to your customers.

Other uses

The Black Hangar has been designed to suit a wide range of uses, from industry seminars such as firefighting seminars or practical firefighting demonstration days, school visits and promotions for associated equipment. With a total floor space of over 500 m², the facility is designed for a range of uses, from smaller meetings of 8-10 people through to larger training courses where aircraft or other large equipment can be brought in for display or instruction.

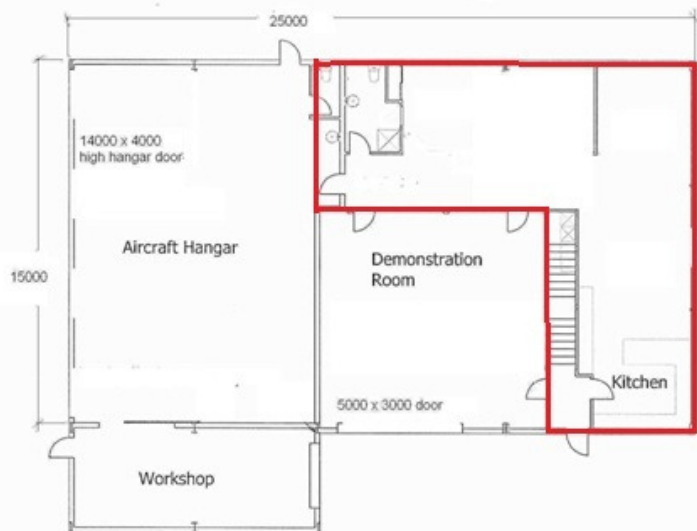

The Black Hangar is near completion – as you can see the grounds are not quite finished! It now needs resourcing with equipment and people. We need funding and in-kind support to get the Hangar ready for use. There are opportunities for sponsorship and advertising rights so if you want to be involved or can help, contact:

jmaber@gmail.com or phone 0274 909341

THE BLACK HANGAR
