

Improving Performance: We Did It

spidertracks
smarter aircraft management

Outline

- Where did we come from?
- What is our solution?
- What market testing have we done?
- What is our addressable market?
- Who is our competition?
- Who is the team behind the technology?
- Why will we continue to be successful?

Where did we come from?

What is our solution?

real-time aircraft
tracking

global two-way
messaging

emergency management
framework

in-flight event
reporting

What test marketing have we done?

ATaaS

Fleet command and control —
without the capital outlay.

ATaaS is aircraft tracking and management as you need it.

spidertracks
smarter aircraft management

Spider Events

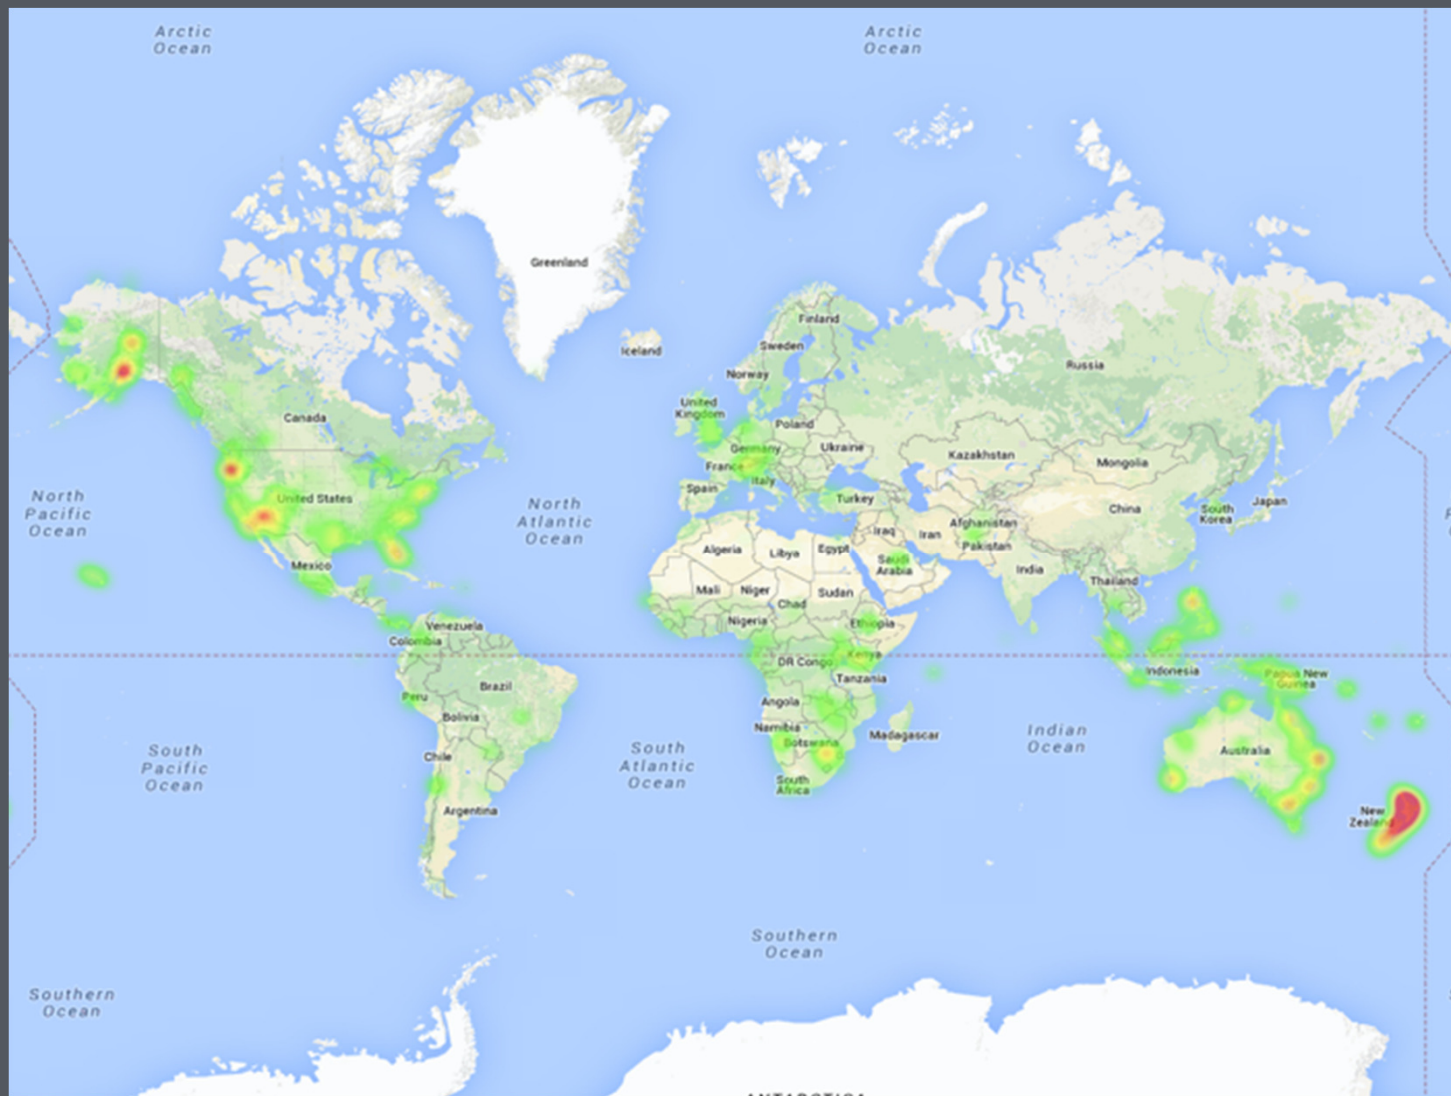

Aircraft event management — without the hassle.

Spider Events allows operators to report specific aircraft or
equipment events in real-time.

What is the total market?

Who are our competition?

Who is the team behind the technology?

Why will we be successful?

“If you only focus on building a product to be a commercial success and make money, then you’ve already failed.”
